

We are a firm of chartered accounts based in Camberley who use e-mails and cloud based software constantly therefore having our computer system in working order is very important to us. We also have a responsibility to protect our client's private data.

We have been a client of Supporting Role for over 6 years and are very happy with the service we receive. When Roland, Alison and myself took over Butt Miller two and a half years ago and needed to upgrade our servers, we did look around at other computer support companies to see whether or not we would be better off switching. After looking at Marco's competitors we concluded that Supporting Role couldn't be matched on service or experience.

Marco visits our office twice a month but is always on hand if there is an immediate problem to be solved. He is friendly, helpful and goes out of his way to assist us even if the problem isn't related to our work computers.

All in all I would definitely recommend Marco and Supporting Role to any company who want to feel safe in the knowledge that their computer system is working as it should and is suitably protected against potential outside threats.
